

:::::Android Soundset::::: created by Andrew Meadors
hello Virus users
this soundset was made on my Access Virus A (2.8)
This has lots of Bass's all tempo's are preset
to Drum n Bass standard 170bpm, there are also
some nice Ambient Pads, IDM style EFX, and some
Arpeggiators with slower Bpm's for the Trance heads.

Inspired by the sounds of Andy C, Photek, Dillinja,
Bad Company, Underworld, and Optical.
These sounds pay homage to the progressive styles
of electronic music. Included for fun are a few retro
patches with more of an 8 bit feel.

If you wish to publish anything that uses my patches
please ask for my permission first, I'm more than happy
to work something out, I'm also very interested in
hearing your songs.

Andrew Meadors -(android_dj@hotmail.com)-

note: the AM at the end of each patch represents the
authors name. please do not resell these patches.
thanks and enjoy!
