

rEaIm's Mythology Soundset
01-26-04

This Soundset will load into the User A Bank by default. If you do not wish to overwrite patches in this Bank, be sure to activate the ForceToBankB function on the MIDI DUMP RX page of the System Edit Menu.

All patches in this Soundset have their base tempo set to 136 BPM's, and their pitchbend range set to either +/-7 or +/-12.

All Soundset patches created specifically for the Access Virus "C" range of synthesizers. While these patches will load into the "A" and "B" series synths as well, please be aware that extensive use of features specific to the "C" range (namely the EQ and the new Moog-based filter) may cause some patches to sound entirely different from what I intended.

All patches are free to use as you wish, though if you do end up using one in a song that gets released, please contact me via the information below, as I would love to hear it! I'm always open to suggestions and comments as well.

Peace and beats,

rEaIm
