dinosaur crossgrade for Zebra V2

With the dinosaur crossgrade you can obtain Urs Heckmann's infamous Zebra wireless modular synth for 50\$ less than the normal price. But it involves some action on your side. It's not overly complicated, just look at the steps on the right side.

Unlike some other crossgrades, you don't loose the option to furtherly use the stuff you're crossgrading from. But will you really use it anymore when you've got Zebra at your disposal?

Better yet, if you send in something that blows us away, you might even be rewarded with an extra goodie. No warranties here, but a good chance to soup up your arsenal!

Step1:

print this card on a colour laser or ink jet printer
cut out and fold in the middle

put on your ancient hardware analog synthesizer dinosaur
(You're not sure if your hardware is accepted? – Ask via email!)
make a digital photo (between 800x600 and 3000x2400 pixels)
needless to say, the bottom part of this card must be clearly visible
send photo (JPEG preferred) to urs@u-he.com

Step2:

you'll receive a Coupon code for ShareIt over 50\$ US off of the normal price of Zebra2 that you can use upon purchase

Step3:

make great music with Zebra
be proud if your photo makes it into the Z2 crossgrade gallery!
