

A Young Lady's Illustrated Primer to Themeable items in Cakewalk

About the Theme Editor

The Cakewalk Theme Editor is an application that allows us to modify default values for Colors and Images in various parts of the Cakewalk user interface (UI). Some of these items are very obvious in form and function; others are more cryptic or overloaded with multiple effects.

Many of the color values are impossible to determine by name alone, and some are even mis-named. Other items don't appear to be used at all, either obsolete or reserved for future use.

About this document

This document illustrates where editable items are used in the Cakewalk UI, by showing the effect of changing the color or image.

- I used the standard "Mercury" theme as a baseline.
- I've applied pink color shades in the Theme Editor to highlight where in the UI each color or graphic is used.
- "Not yet identified" means that I've searched for the highlighted item in the UI and not found it. It could mean that the item is obsolete and no longer used; or it could be reserved for future use; or I just didn't activate the right part of the application to see the item.
- "TBD" (i.e. "To be done") means that I haven't looked at the item yet. Stay tuned for updates!

It is a work-in-progress. Please feel free to comment or suggest updates to it on the Cakewalk User Forum.

Document version	0.9.4
Theme Editor:	v.1.2.0.14
Cakewalk	v.2019.11.0.63

Prepared by: [Colin Nicholls](#), with thanks to the Cakewalk Developers and the denizens of the Cakewalk User Forum: [User 905133](#).

Known Bugs

Refreshing the UI after changing a theme ideally requires re-starting Cakewalk. Merely swiching themes in an open instance of Cakewalk may not fully respect the theme changes. Clearly there's some caching going on.

Importing changes from one theme into another does not always include all changed items. Use with caution and double-check the results.

Tips and Tricks

You can open two instances of the theme editor at once, and copy-and-paste items between two different themes. Very useful!

A. Items by Theme Editor Hierarchy

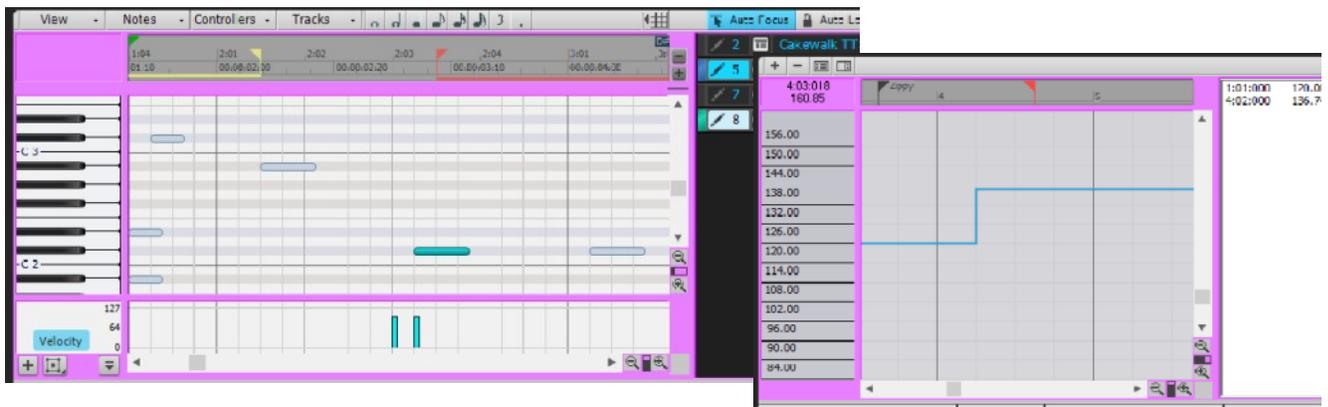

1. Global

Toolbar Background SCREEN_TOOLBAR_BKGD

Track view window frame and MIDI track note map scale values:

PRV and Tempo View window components:

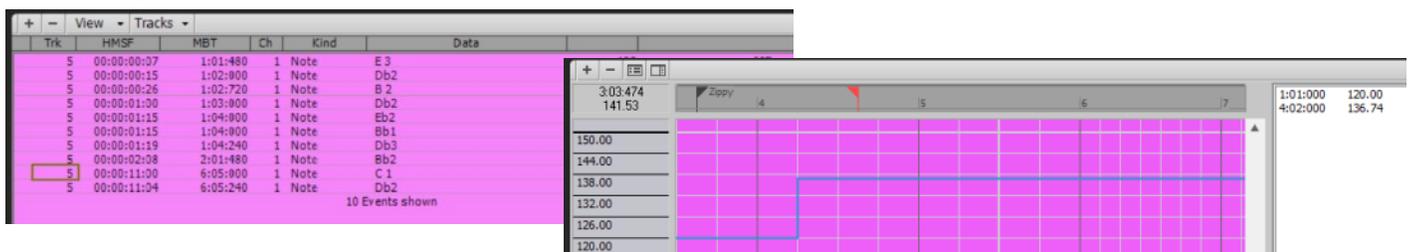

VST windows:

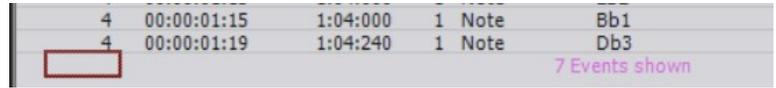

Window Background SCREEN_BK/IDR_CLR_PRESET_0

Event view , Tempo view:

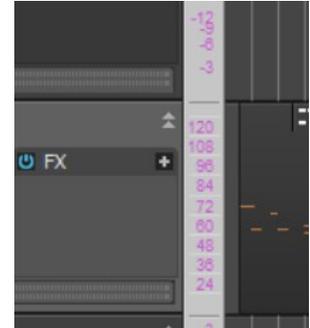

Window Text SCREEN_TEXT

Event List footer. I can't find any other use of it.

Toolbar Static Text SCREEN_TBAR_STATICTEXT

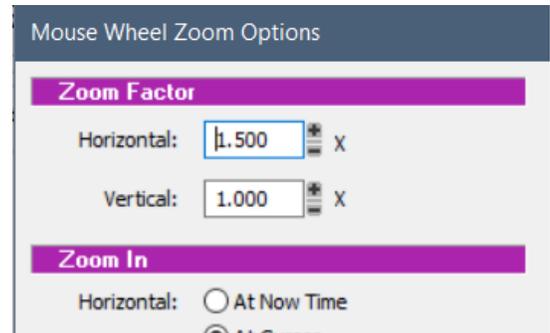

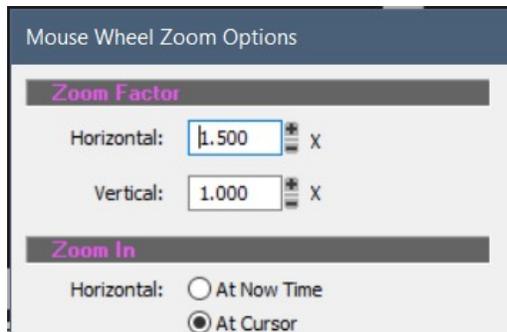

shows up in the Track View vertical rule text:

Dialog Box Banner Text SCREEN_BANNER_TEXT

Dialog Box Banner Background SCREEN_BANNER_BKGD

Headings in dialog boxes:

Alternative Text #1 IDR_CLR_GLOBAL_09

Selected ProChannel module header text

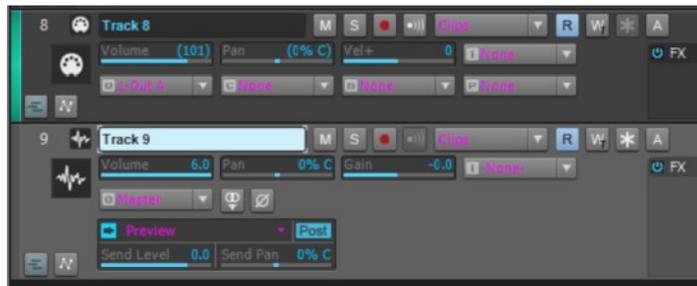

Alternative Text #2 IDR_CLR_GLOBAL_11

1. Control Bar modules: Custom, Screenset, Sync, Mix Recall, ACT, Markers:

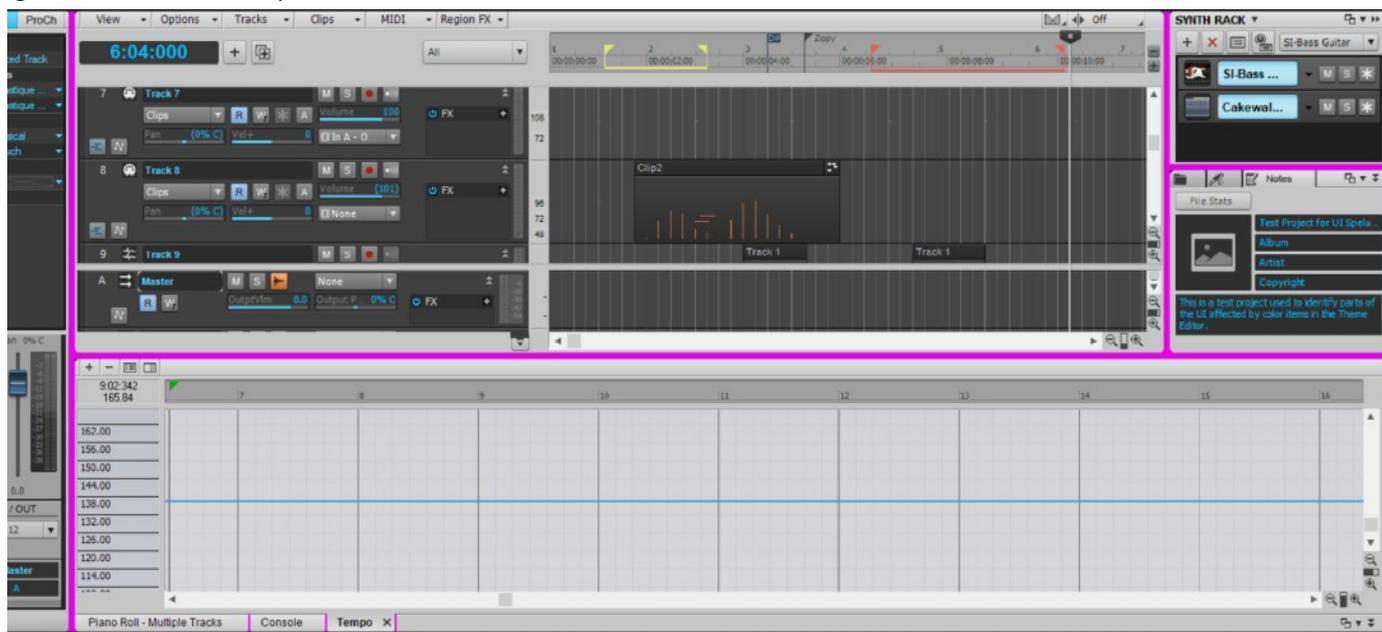

2. Track view header strips drop-menu text (including Sends):

Sizing Bar Background IDR_CLR_GLOBAL_O2

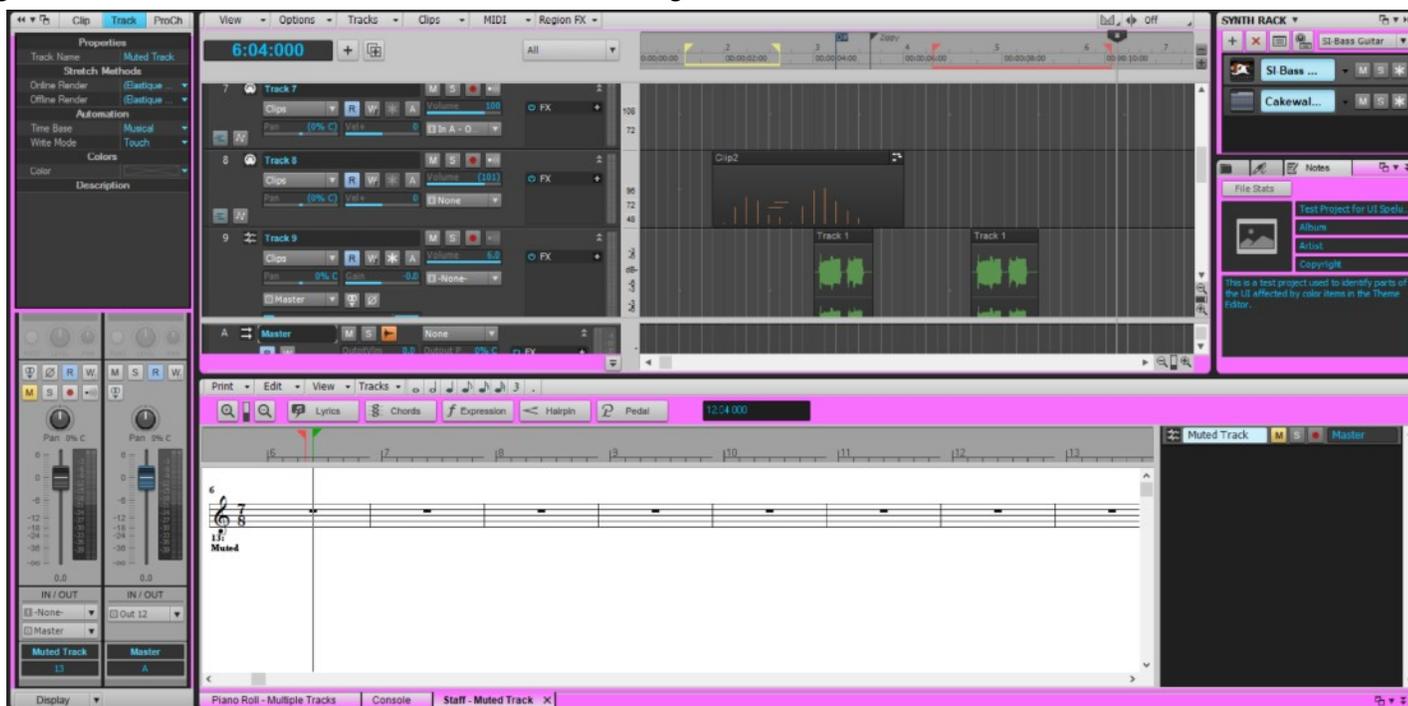

Re-sizing bars; Multi-dock tab separator lines:

Note that, in practice, anything other than a dark color is probably not going to work so well - the multi-doc tabs really need it.

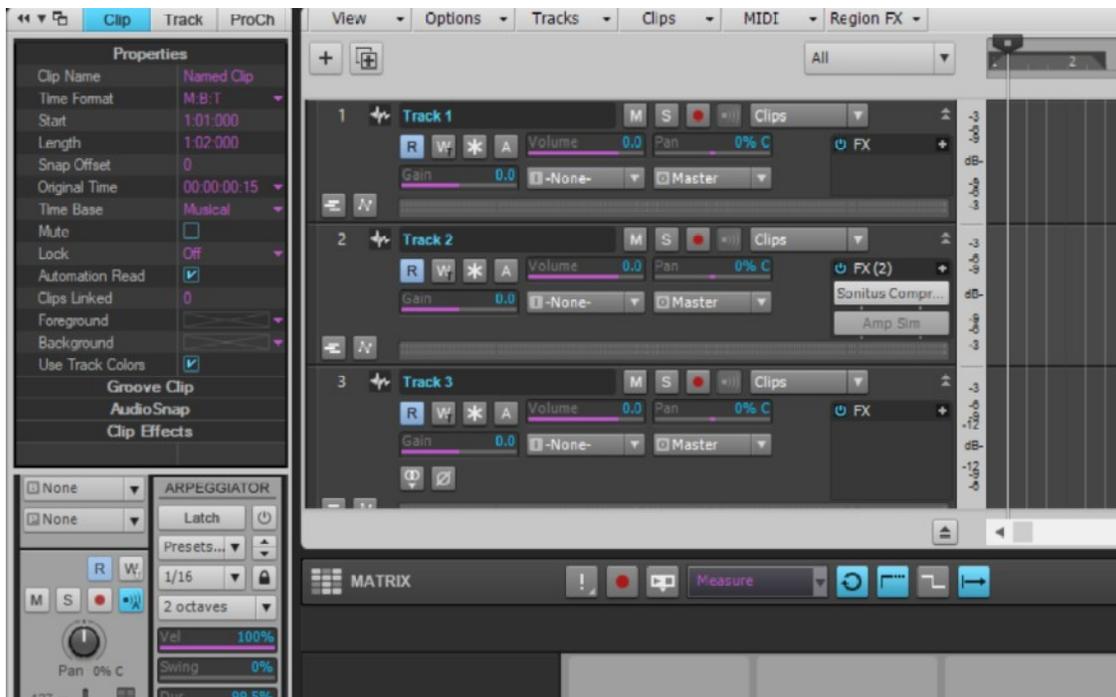

View Border IDR_CLR_GLOBAL_O3

Skylight Interface borders; Multi-dock tabs; Staff view toolbar background:

Horizontal Sliders IDR_CLR_GLOBAL_05

- Track View/Inspector control slider bars;
- Clip/Track/Bus property value text;
- Matrix View drop-down text:

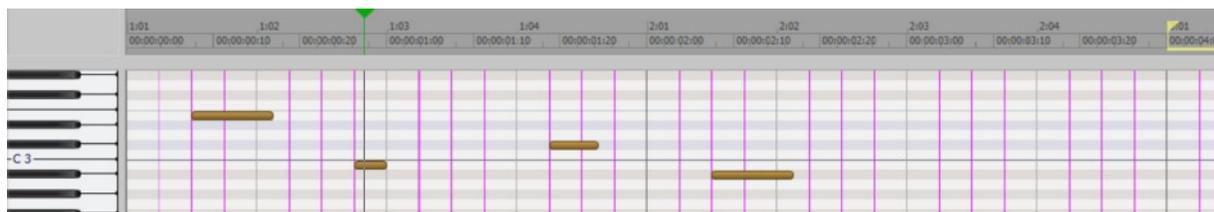

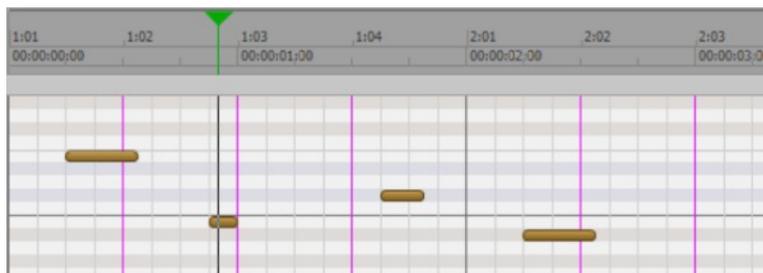

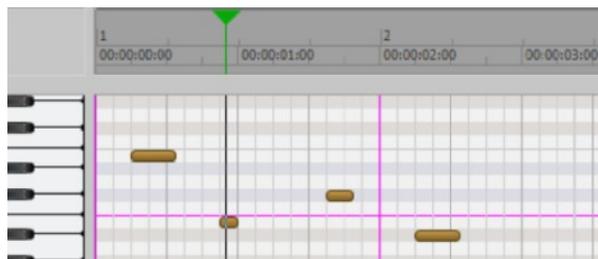

Alternative Color #1
Drop Indicator

IDR_CLR_GLOBAL_15
IDR_CLR_GLOBAL_22

Not yet identified
Not yet identified

Major Rules SCREEN_BIGRULES
Beat Rules SCREEN_BEATRULES
Grid Rules SCREEN_GRID_RULES

PRV Major Rule lines, Beat lines, and minor grid lines:

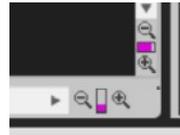

Quick Group SCREEN_WIDG_QUICKGROUP

More on [Quick Groups](#) . Here is where the color shows up:

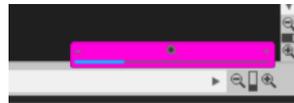

Enable/Disable Toggles SCREEN_FX_BYPASS Not yet identified

Zoom Fader IDR_CLR_GLOBAL_12

Zoom Horizontal Background (img)

Zoom Vertical Background (img)

Frame Rounded Corner Bottom Left (img)

Not yet identified

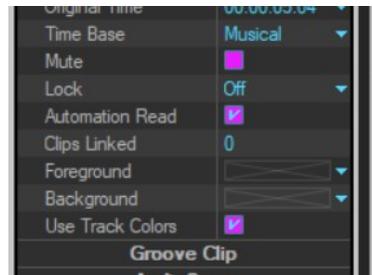

Frame Rounded Corner Bottom Right (img)

Not yet identified

Check Box Small ON (img)

Check Box Small OFF (img)

In Track/Clip properties:

Dock (img)

Undock (img)

Drop (img)

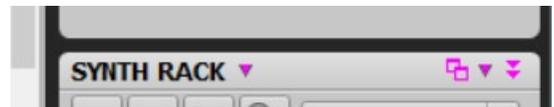

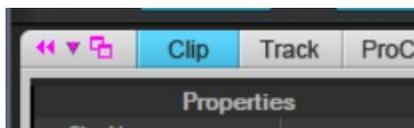

Dockbar Right (img)

Dockbar Left (img)

Dockbar Up (img)

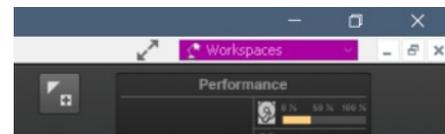

Dockbar Down (img)

These seven items are used in several places throughout the Skylight UI for showing and hiding panels:

Lenses dropdown menu (img) IDB_WORKSPACES_DRP

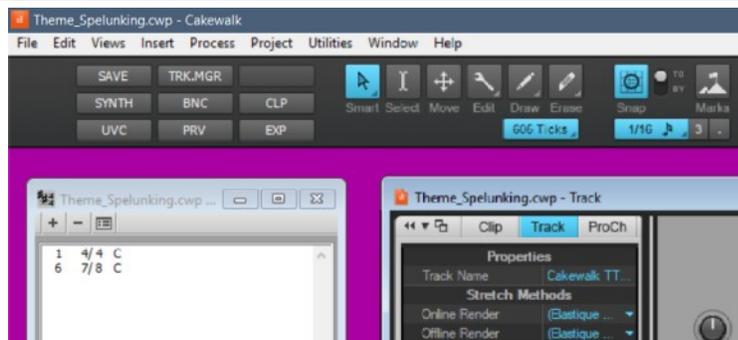

The "Lenses" feature is now called "Workspaces":

Full Screen toggle (img) IDB_FULL_SCREEN

(see image above)

Wallpaper (img) IDB_WALLPAPER_PRODUCER

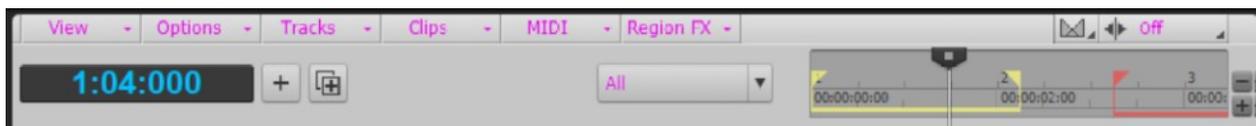

1.1. Global | Menus

View Menu Text IDR_CLR_GLOBAL_01

This impacts a lot of different places in the UI:

1. Track View drop-down menu text:

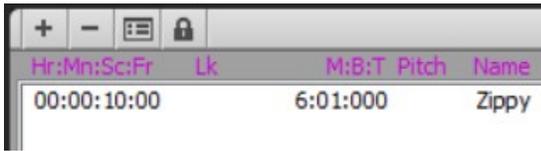

2. Multidock Tab labels:

3. Docked window titles and drop-down menu text; ProChannel text and values:

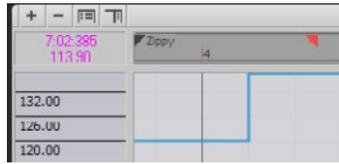

5. Marker View, and Event List View column headers:

Trk	HMSF	MBT	Ch	Kind	Data
4	00:00:00:07	1:01:480	1	Note	E 3
4	00:00:00:15	1:02:000	1	Note	Db2
4	00:00:00:26	1:02:720	1	Note	B 2
4	00:00:01:00	1:03:000	1	Note	Db2
4	00:00:01:15	1:04:000	1	Note	Eb2

6. Tempo View mouse cursor location read-out text:

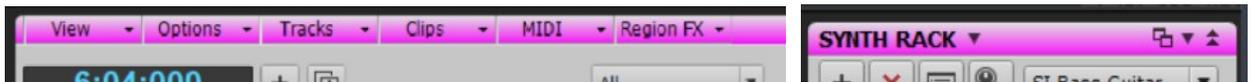

MenuBar Gradient Start

IDR_CLR_GLOBAL_16

MenuBar Gradient End

IDR_CLR_GLOBAL_17

Note that Multidock tabs are NOT affected by this color item, unlike "Gradient Start" (although there is a thin line visible):

MenuBar Border Light

SCREEN_MENUBAR_BORDER_LITE

(yellow)

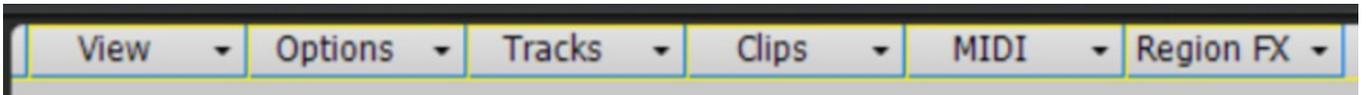

MenuBar Border Dark

SCREEN_MENUBAR_BORDER_DARK

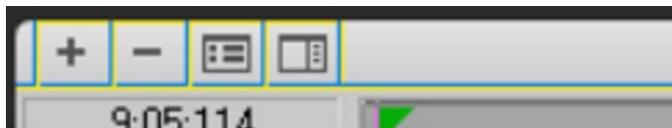

(blue)

You can see how the two colors are used in various places in the UI:

Track View:

Tempo View:

Synth Rack:

1.2. Global | Scroll bars

Scroll Bar Background

IDR_CLR_GLOBAL_04

light pink:

Scroll Bar Thumb

IDR_CLR_GLOBAL_18

dark pink:

Zoom In (img)

Zoom Out (img)

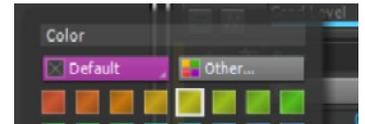

You can see these in the previous entry, the two "magnifying glass" icons for zooming the workspace in and out.

1.3. Global | Track Color Picker

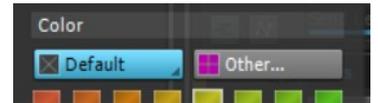

Background (img)

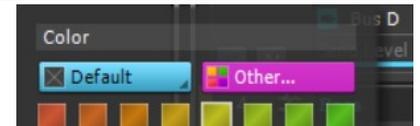

Color drop-down (img)

Other Color Empty (img)

Other Color Button (img)

1.4. Global | About Box

Background (img)

I don't know where the following logos are used in the UI:

ARA logo (img)

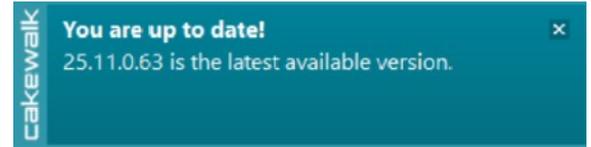

ReWire logo (img)

ASIO logo (img)

VST logo (img)

DXi logo	(img)
Izotope Radius logo	(img)
SoundCloud logo	(img)

1.5. Global | Toast notifications

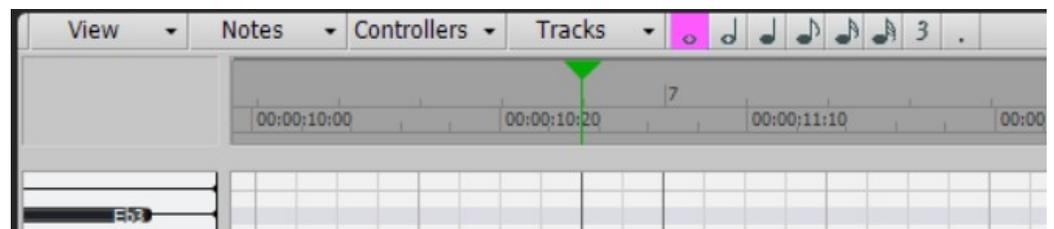

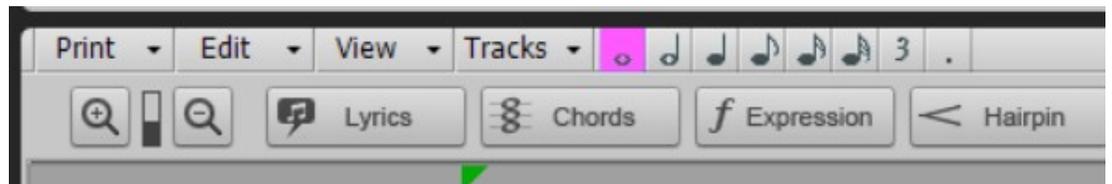

These items are all pretty obvious.

Cakewalk logo	(img)
Close button	(img)
Warning icon	(img)
Error icon	(img)

1.6. Global | Note Draw Duration Buttons

These are used in Staff view; and also the Piano Roll view:

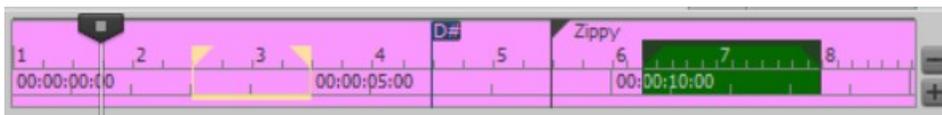

Whole	IDB_NOTE_DURATION_WHOLE
1/2	IDB_NOTE_DURATION_HALF
1/4	IDB_NOTE_DURATION_QUARTER
1/8	IDB_NOTE_DURATION_8TH
1/16	IDB_NOTE_DURATION_16TH
1/32	IDB_NOTE_DURATION_32ND
Triplet	IDB_NOTE_DURATION_TRIPLET
Dotted	IDB_NOTE_DURATION_DOTTED

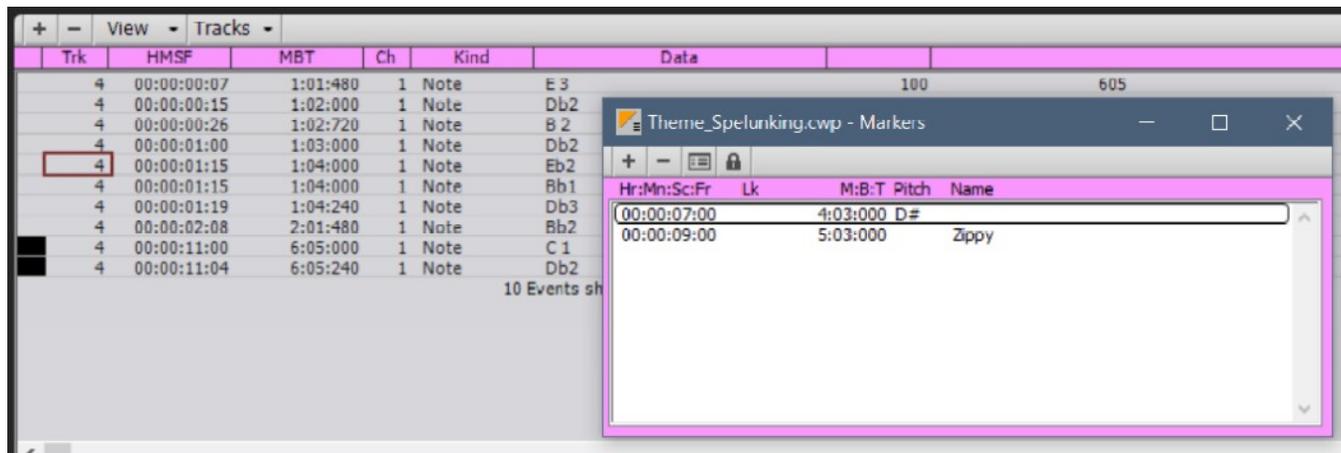

2. Time ruler

Time Ruler Background

SCREEN_TV_RULER_BKGND

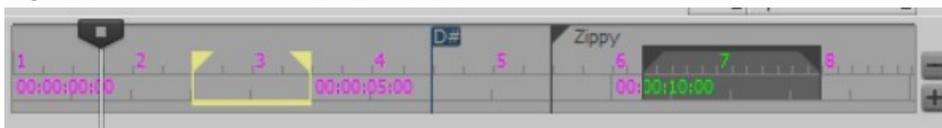

Note this also affects Marker View and Event List View:

Track View Time Ruler Digits

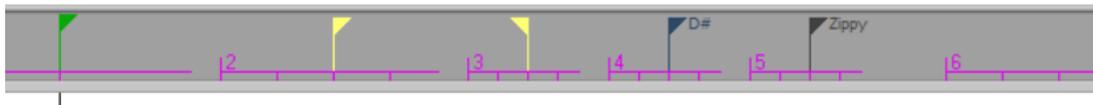

SCREEN_TV_RULER_TEXT

Note this also affects Event List View:

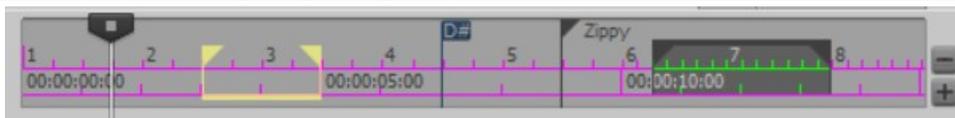

Trk	HMSF	MBT	Ch	Kind	Data
4	00:00:00:07	1:01:480	1	Note	E 3
4	00:00:00:15	1:02:000	1	Note	Db2
4	00:00:00:26	1:02:720	1	Note	B 2

And Staff View uses this color item for both digits and tick marks:

Time Ruler Tick Marks

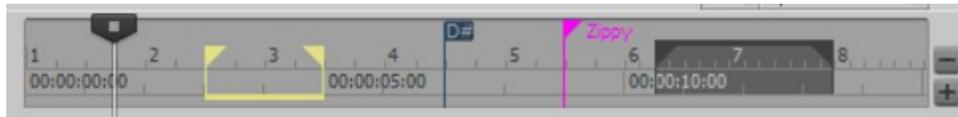

SCREEN_TIME_RULER_TIK

2.1. Time ruler | Markers

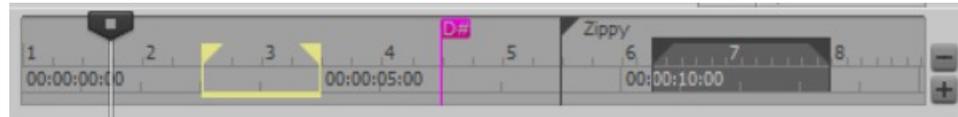

Markers

SCREEN_MARKERS

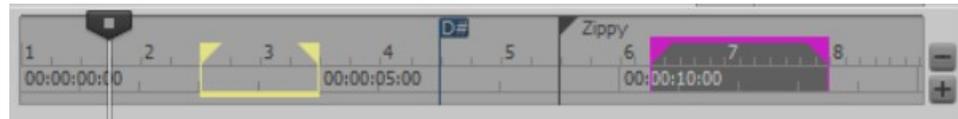

Pitch Markers

SCREEN_PITCH_MARKER

Selection Markers

SCREEN_SELPOINTS

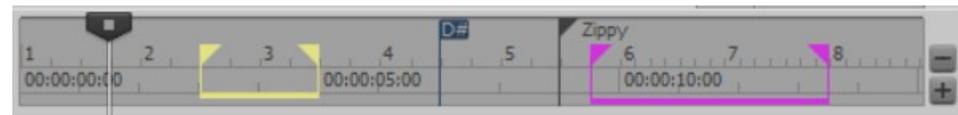

Loop Markers

SCREEN_LOOPPOINTS

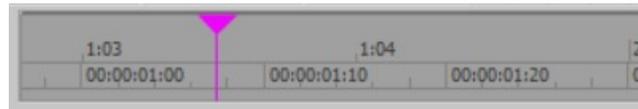

Punch Record Markers

SCREEN_PUNCHPOINTS

Now Time Marker

SCREEN_NOWTIME_MARKER

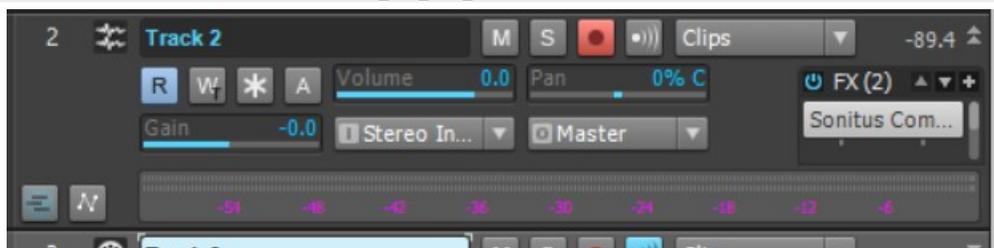

3. Meters

3.1. Meters | Segmented meters

VU Tick Marks

SCREEN_VU_TIK_TEXT

3.2. Meters | Non-segmented meters

These colors only apply when the display is set to Non-segmented meters:

VU Lo level	SCREEN_VU_COLD	light grey
VU Hi level	SCREEN_VU_HOT	
VU Tick Marks	IDR_CLR_GLOBAL_21	pink

The Tick Marks do not appear in the Track Header strips, only the Console.

3.3. Meters | Track view meters

These items are mostly straight-forward. The images are intelligently resized along with the track strips.

Vertical Audio Meters	(img)	
Vertical Audio Meters (narrow)	(img)	
Vertical Audio Meters (very narrow)	(img)	
Vertical Audio Meter Scale background	(img)	Not yet identified
Horizontal Audio Meters	(img)	
Horizontal Audio Meters (narrow)	(img)	
Horizontal Audio Meters (very narrow)	(img)	
Horizontal Audio Meter Scale background	(img)	Not yet identified
Vertical MIDI Meters	(img)	
Horizontal MIDI Meters	(img)	
Background VR	(img)	Not yet identified

3.4. Meters | Console view meters

These items are mostly straight-forward.

Audio Meters	(img)
Meter background	(img)
Audio Meters (narrow)	(img)
Audio Meters (very narrow)	(img)
MIDI Meters	(img)

4. Control Bar

Background Fill (img) Not yet identified

Cakewalk logo (img)
Appears on the far right of the control bar.

Go to First Module (img)
Go to Previous Module (img)
Go to Next Module (img)
Go to Last Module (img)

Applies to when the main window is narrower than the visible set of modules:

Go to First Module (collapsed) (img)
Go to Previous Module (collapsed) (img)
Go to Next Module (collapsed) (img)
Go to Last Module (collapsed) (img)

Same as above, only for "collapsed" control bar:

Scroll Fade (img)

Transparent "fade out" appears when the Go to buttons are visible:

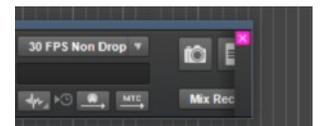

Background (collapsed) (img)

Appears to be overlaid with the module's "collapsed background". Some kind of alpha-channel (transparency) is applied. In this case, a solid pink rectangle appears as:

Close (img)

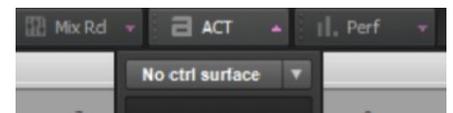

Only visible when the control bar is floating:

Scroll Go To (img) Not yet identified

Collapsed Background Pop-up (img)

Little up/down arrows, only used when the control bar is "collapsed":

Left Border Grip (img)

Not visible when control bar modules are "locked"

Left Border No Grip (img)

Only applies when "Lock Module Order" is selected (not visible when justified or centered):

Collapsed Vertical Background (img)

Collapsed Vertical Background Left Grip (img)

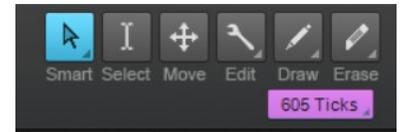

Collapsed Vertical Background Left (img)

Not yet identified

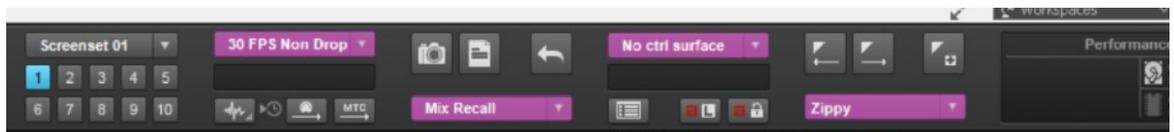

Menu Button (img)

I've only seen this used on the Tools module:

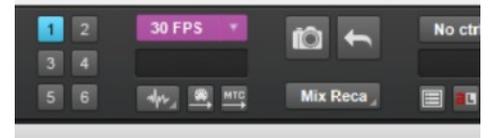

Menu (wide) (img)

Looks as though this is used in Sync, Mix Recall, ACT, and Marker modules:

Menu (medium) (img)

Used by the Sync module when sized to "Small":

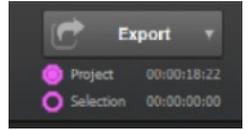

Menu (narrow) (img)

Used in Mix Recall and ACT when modules are resized to "Small":

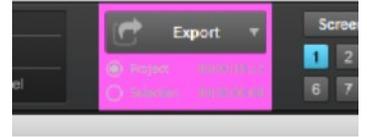

Radio Button (img)

Custom Button (img)

This is worth some research.

In **Mercury**, the button image is:

Let's see how that is reflected in the rendered UI:

From left to right we have: Normal; Mouse-over; and Un-assigned:

From left to right we have: Normal; Mouse Down/Clicked; and Normal:

So I'm going to conclude that the function of each sub-image is, from left to right:

- Normal
- Clicked/Mouse-down
- Mouse-over / Hover
- not used? **not identified**
- Blank / No function assigned

Let's compare:

In **Tungsten**, the button image is:

Interesting, we have some transparency/alpha-channel in play:

Let's see how that is reflected in the rendered UI:

From left to right we have: Normal; Mouse-over; and Un-assigned:

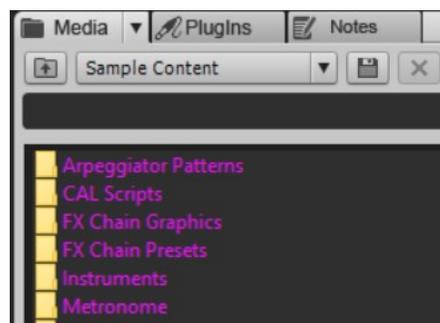

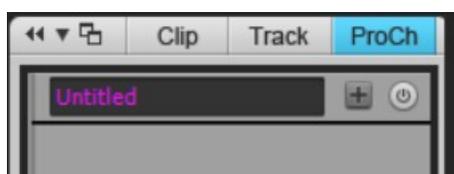

From left to right we have: Normal; Mouse-down/Clicked; and Normal:

TBD

Edit Filter (img)

Read Automation (img)

Eight possible states:

- Enabled, Inactive (Off)
- Mouse down (pressed) when Inactive
- Mouse over (highlight) when initially Inactive
- Enabled, active (On) - this is the default state for "Read Automation"
- Mouse down (pressed) when Active
- Mouse over (highlight) when initially Active
- unknown state (disabled?)
- Indicates that there are multiple take lanes with different Read Automation states

Global Read Automation Disable (img)

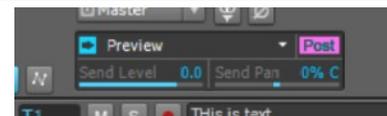

Compare with previous item. Also:

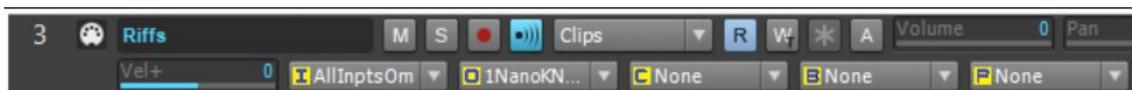

Left: Global Override=Enable (default); Right: Global Override=Bypass

6. Console view

Unfocused Strip Background

IDR_CLR_CV_09

Note the selected strip, and also that it does not apply to the Track View.

Focused Strip Background

IDR_CLR_CV_10

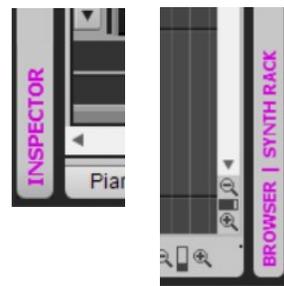

Strip Label Text	SCREEN_CV_LABEL_TXT	Not yet identified
Strip Background	SCREEN_CONSOLESTRIP	Not yet identified

Control Text and Values	SCREEN_CVCTL_TEXT
-------------------------	-------------------

This color item is also used for Inspector collapsed heading text:

Slider	SCREEN_CVSLIDER	Not yet identified
Slider Background	SCREEN_CONSOLE_SLIDER_CTRL	Not yet identified

Splitter Gradient (Top)	IDR_CLR_GLOBAL_23
-------------------------	-------------------

Splitter Gradient (Bottom)

IDR_CLR_GLOBAL_24

Footer Gradient Start

IDR_CLR_CV_05

Footer Gradient End

IDR_CLR_CV_06

Looks like the footer only appears when a horizontal scrollbar doesn't overlay it:

Background #1

IDR_CLR_CV_01

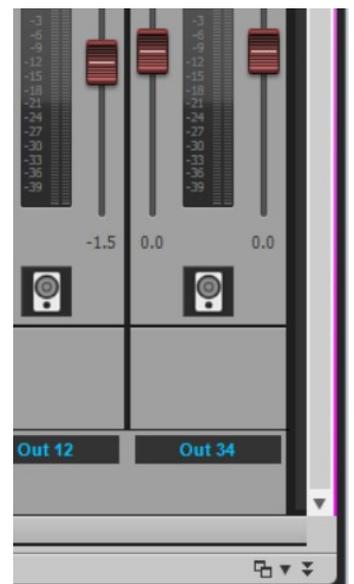

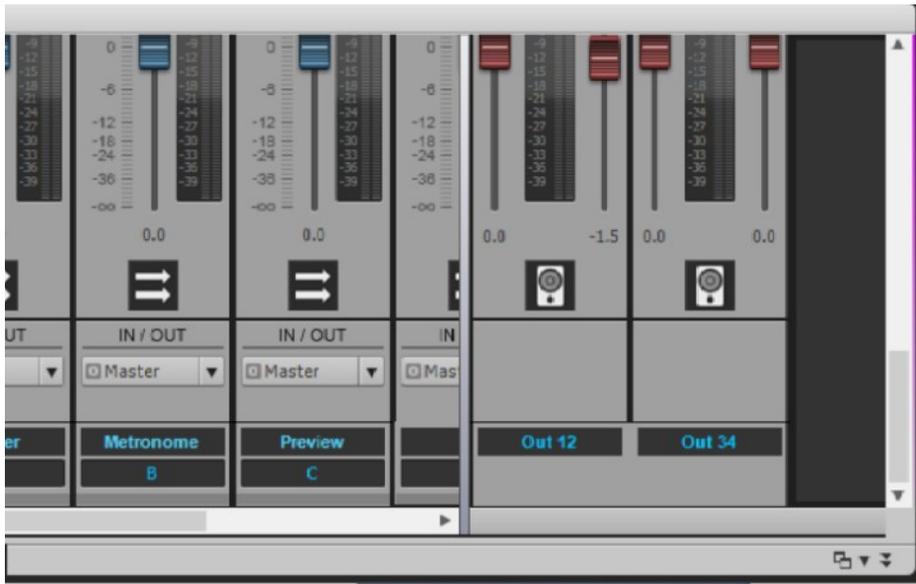

Vertical Scroll Strip Background Gradient (top)

Vertical Scroll Strip Background Gradient (bottom)

Subtle on the far right:

Horizontal Scroll Strip Background (top)

Only visible when not overlaid by horizontal scroll bar:

- Knob (img) TBD
- Knob Unipolar (img) TBD
- Knob (small) (img) TBD
- Knob Unipolar (small) (img) TBD

Menu (img) pink

Menu (pressed) (img) dark pink

Fascinating - the "pressed" or "non-pressed" state is used for different buttons, not different states:

Menu (pressed) is used mostly(!), only MIDI tracks use *Menu* for a couple of controls. What about "narrow"?

Menu (narrow) (img) pink

Menu (narrow pressed) (img) dark pink

Only the "pressed" state seems to be used for the narrow strips:

B. Case Studies

1. Control Bars

I have not found the correct attribute to change to control the background of the Control Bar. However we can work around this.

"Tungsten Slate"

I quite like this effect where each module is clearly distinct, even when the "center and justify" option is selected. This is actually a minimal customization of "Tungsten": The only thing changed is the **Background (large)** item for each module, flood-filling with the slate blue color.

For example, the MixRecall module:

Note that the image actually has a transparent border on three sides, and we are not changing that. Our blue-grey fill is constrained to the existing border.

This is cool. I went ahead and customized the remaining background images for the modules (for medium and small sizes), but after I'd finished, the Control Bar suddenly changed:

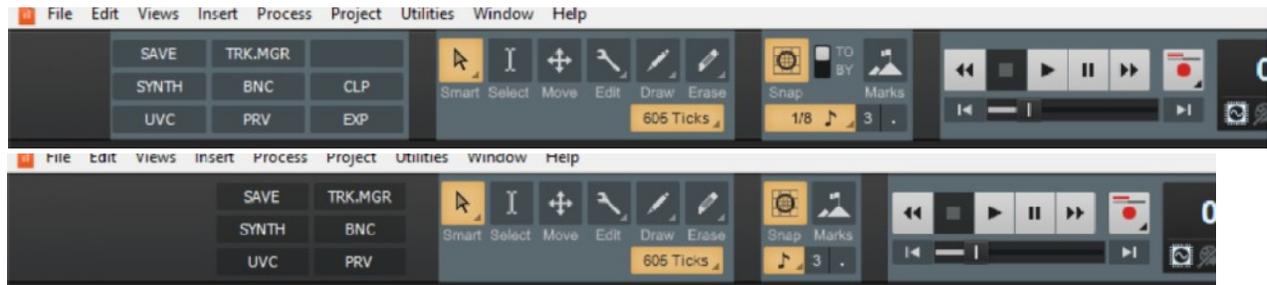

See how the background is now a continuous slate blue instead of the individual modules position on a black background? This is a nice look, but something must have triggered this rendering difference...

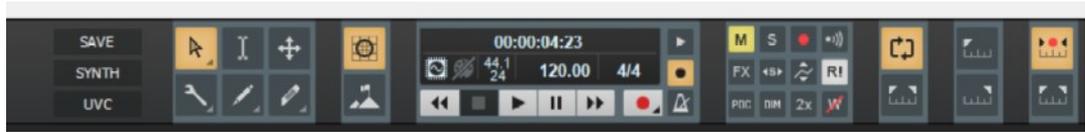

On a hunch, I reverted the following images from **Control Bar | Modules**, and saved the theme:

Custom | Background (medium) (img)

Custom | Background (small) (img)

Now I see:

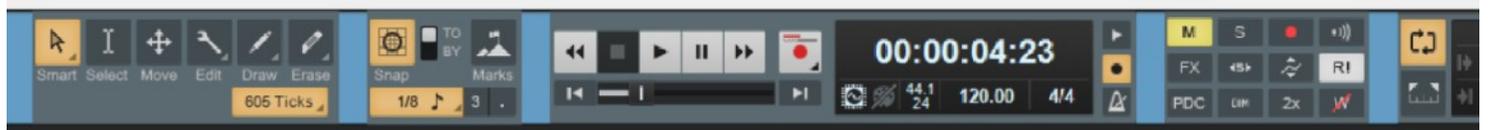

Of course, the Custom module now doesn't have the slate blue background at medium and small sizes, as expected.

When I carefully re-implemented the slate blue background for the **Custom | Background (medium)** item, the Control Bar background once again flood-filled with the blue.

It is only the (medium) size that exhibits this side-effect. Setting a custom background color on the (small) background behaves as expected.

This is almost certainly a bug but it does give us a way to flood-fill the Control Bar Background with a specific color... it just has to be the color of that image (**Custom | Background (medium)**). Here, I set it to blue:

Yeah, although this behavior probably won't change, I don't think I'll be leveraging it.

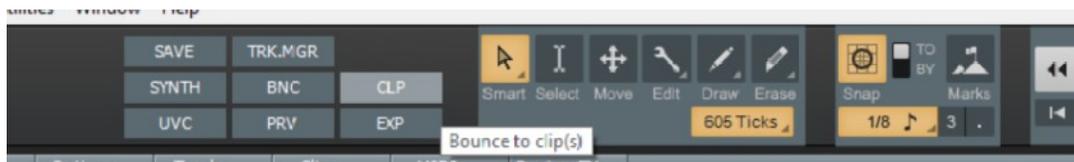

Aside

Interesting - in the example on the previous page, do you see how the custom buttons have also changed color? This is a feature of how the custom button item is implemented in **Tungsten**. (See 4.15 above for a detailed comparison with **Mercury**).

This gives me an idea... what if we revert all of the background images (normal, medium, small) and instead, adjust the button image to use the slate blue color:

This results in the following:

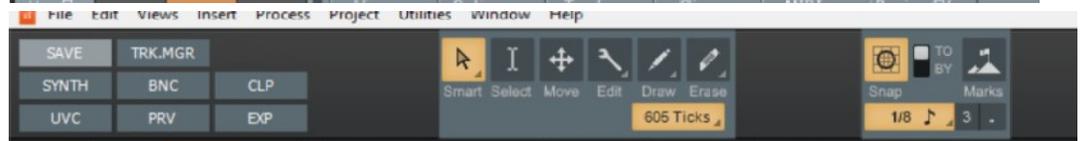

You know, that's pretty sexy. The mouse is hovering over the CLP button of course.

How does this look if we try some other Control Bar display modes?

Normal:

Lock order and Justify:

Nice. I like it. I think that's a keeper.

2. Clip Colors

One of the first things I did after playing around with color options in earlier versions of Cakewalk was to try and make the clips look like other DAWs that I admired. This can be an uphill battle because Cakewalk doesn't expose every possible color used by the application to indicate clip state. And there are a lot of variations:

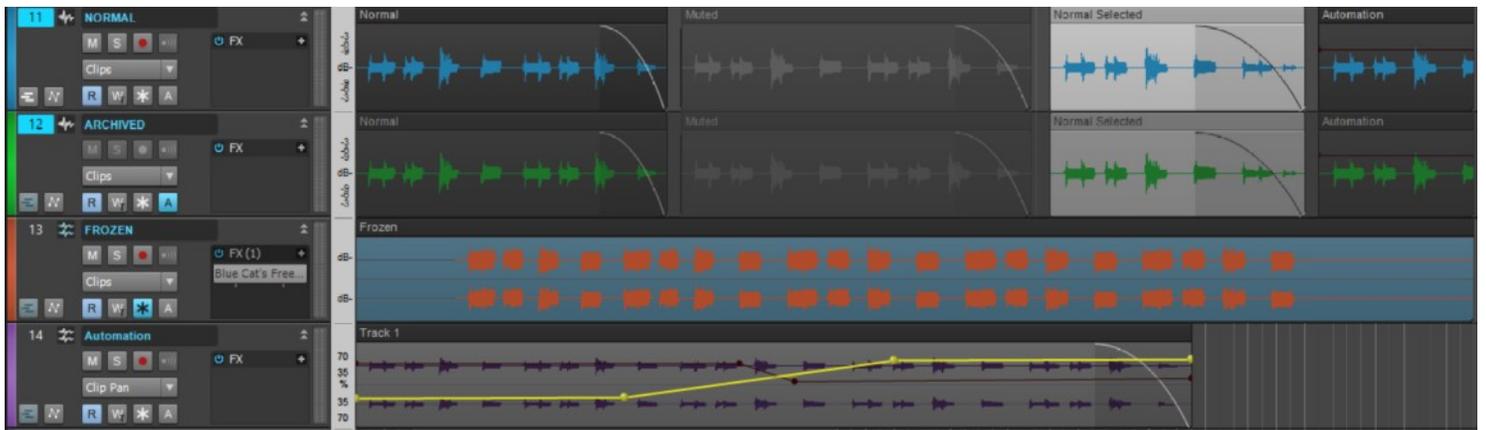

You have to consider:

- Clip headers and names;
- Clip fades and cross-fades;
- Selected and or Muted clips ;
- Archived and Frozen tracks

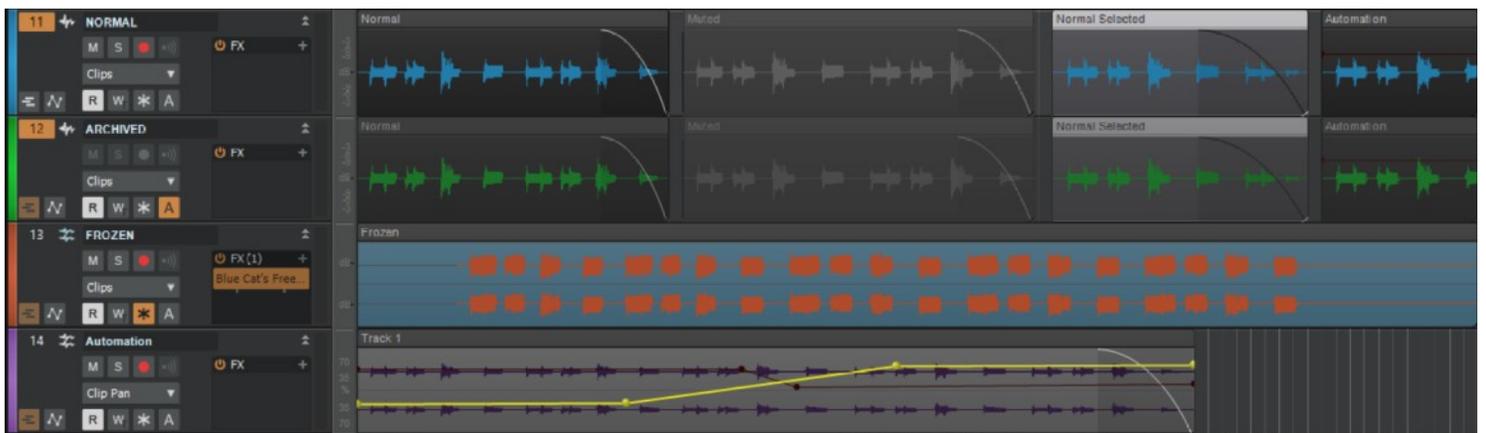

...and probably more.

For clarity, you're really better off exploring the possibilities within the "Cakewalk way" of coloring clips. Obviously you can't stop a user from customizing the foreground and background colors on a per-clip- or -track basis, but you should try to make the defaults work in a reasonable way.

2.1 Mercury (default)

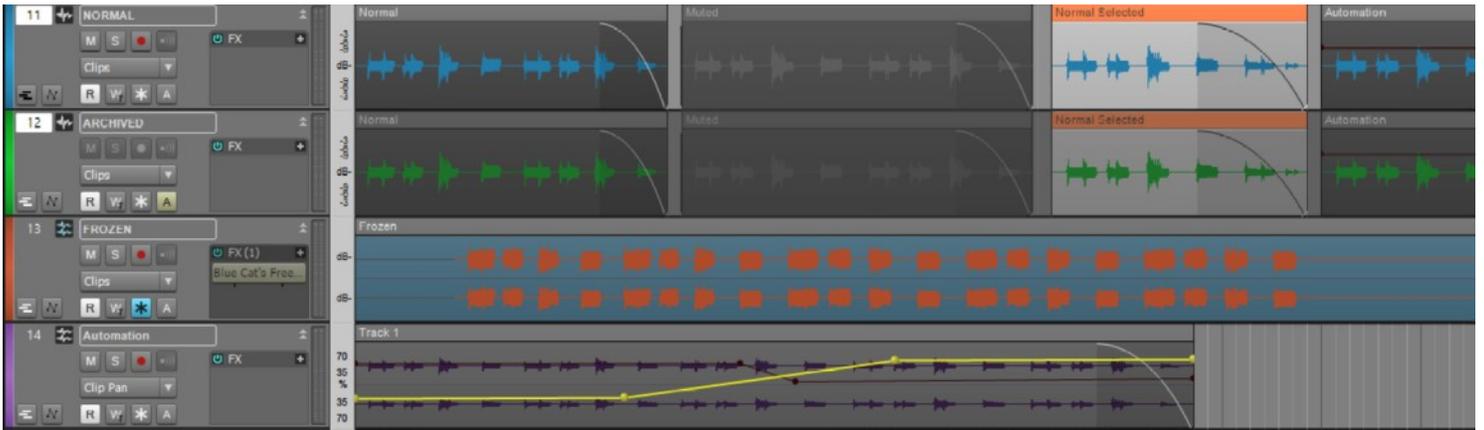

2.2 Tungsten (default)

I think the clip background is too dark by default - you can't really see the clip automation at all in the unselected clips at right.

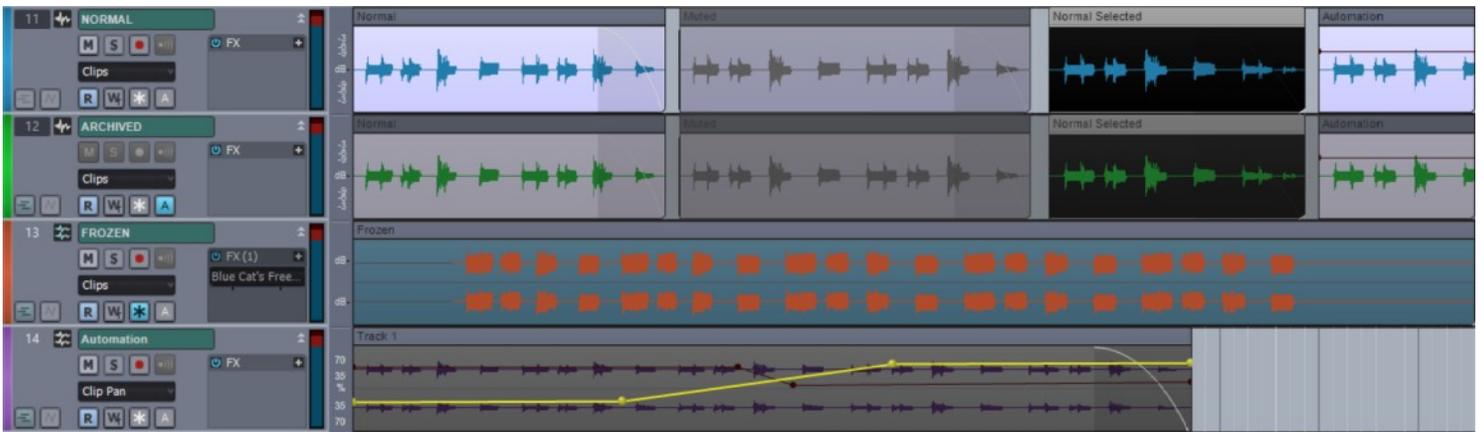

2.3 Boston Flowers (custom)

MarianoGF obviously put some thought into how clips are colored by default, and it works:

2.4 Sonar 85 (custom)

Trance-Canada did a good job with this one, it's very clear, even though light-colored backgrounds can make clip fades hard to see:

2.5 "White Clips" (experimental)

I used a bright white default background, and a pale green for "selected":
