

Waldorf MWII/XT/XTk synthesizer Usersoundset 2

This PDF file gives information on the Waldorf **MWII/XT/XTk** synthesizer usersoundset 2.

This soundset is build with sounds contributed by members of the Waldorf Forum List. For information on the forum: <http://www.waldorf-music.de>.

The contributed **MWII/XT/XTk** sounds are not changed (except that I programmed Modwheel modulation on most sounds that did not have that).

IMPORTANT!

The set contains sounds, multi's, userwavetables and userwaves and because of this, it is wise to make a backup of your existing sounds etc., because loading this soundset will overwrite every sound, userwavetable and userwave (and the first fifteen multi's)!

This soundset comes with a soundset-demonstration song. The song will be available on Waldorfs ftp-server. It is called "Take your time" and uses only Waldorf **XT** sounds from this soundset.

The people that contributed sounds (in no particular order):

Andreas Gaunitz (BLC), Andrew Scheidler (AS), Boele Gerkes (SCD), Dave Andrus (DA), Fabian Logemann (vHt), dr. Georg Müller (GM), Gregg Janman (GJ), Hakan Olson (HO), Holger Steinbrink aka Tsching (T), Hans Heerrooms (H2), Riccardo ??? (RC), James Maier (JM), Jonathan Hughes (JH5), Kevin Paisly (KP), Mark Dunn (MD), Mike Andrews (M.@), Mike Morton (MAM), Mike Ourednik (M), Mike W. Artemenko (MWA), Phil Smillie (:)), Can (John) Tarcan aka Rizakan (R), Alex Eslava aka Snyxol (Sny), Urs Basig (ub).

I would like to thank Hans Heerrooms, dr. George Müller and Holger Steinbrink for helping me in various ways putting this soundset together.

But most of all: thanks to every contributor for the beautiful sounds and wavetables!

Boele Gerkes

M001: Split in the same sound... Dream away

M002: This one was used in the demosong

M003: There is a switch at velocity 60

M004: Use modwheel

M005: Play a bassriff and keep a low note down every now and then

M006: Modwheel up and play some high notes

M007: Kick is extremely velocity sensitive, also try a C2 and C4: then keys off and wait :-)

M010: Low note and then modwheel

M011: Modwheel!

M013: This one was also used in the demosong

M014: Dr Georg Müllers pianosound is convincing in the low area!

M015: My 10 voices XT can't do it all....
