

The Cakewalk Sonar Shortcut Reference

v5.0.1 - 2005.11.25

by Sonar Shortcut Reference Project

This documentation is meant to be a quick, comprehensive and easy to read reference about all available keyboard and mouse shortcuts and gestures that can help improving the experience with the powerful music authoring application Cakewalk Sonar.

It assembles informations collected from:

- The manual
- The online help
- The quickstart reference
- The "Tip of the Day" hints shown at program startup
- The Sonar Keyboard Bindings Option Dialog
- User suggestions and feedback

There are three PDF versions, different in item sort criteria:

- by Shortcut
- by Description
- by Function

In all versions, informations are grouped by operational context.

A red asterisk next to a shortcut means it is new or changed since Sonar 5.0 and higher.

The reference can be distributed for free as long as the zip archive is distributed as a whole including this readme file.

Mass distribution (magazines, CD and similar media) is allowed only with the written permission of the authors. You can publish a copy of this material on the Internet, but please:

- 1 - Give us proper credit
- 2 - Email us about it so we can update our mirror list
- 3 - Publish only the whole original zip archive, including this readme file

A big "Thank you" to all people that have helped this project growing, and to all that will do it next.

You can contact us by e-mail for feedback, suggestions or whatever at ssrp@prjteam.com.

Hope you appreciate our effort.

Now, we just wish you a good (better?) time with Sonar – and remember, it's all about music :)

Have fun

The SSRP Team

Version history

Date	Version	Status	Notes
2005.11.25	5.0.1	Release	Updated to Sonar 5.0.1
2005.11.04	5.0	Internal only	Following user feedback, release version matches Sonar version
2005.11.03	2.0	Internal only	Updated to Sonar 5.0
2005.02.22	1.01	Release	Updated to Sonar 4.0.2
