## SOUND BANK SERIES

### Installation Instructions

Thank you for purchasing this Sound Bank! We sincerely hope that it will be a great source of inspiration for your next productions. Please follow the instructions below to access your presets.

1. Extract the content of the “UltraFX.zip” archive file onto your Desktop;
2. Launch Ultra Analog;
3. Right-click (Control-click on Mac) anywhere in Ultra Analog’s browser and choose Import... from the contextual menu;
4. Navigate to your Desktop via the Import dialog, select the “UltraFX.axf” Sound Bank file and click Open;
5. Wait for the import process to complete.

Once the import process is completed, you will find your new presets in the Imports folder in Ultra Analog’s browser. At this point the Sound Bank file is no longer needed so you can discard it. You should however keep the archive file for backup.
